EDUCATION

Emory University School of Law 2025

Spelman College 2022

Jada Bowden's legal journey began at Spelman College, where she pursued her undergraduate studies and graduated in 2022. Driven by a deep interest in advocacy and client-centered work, she went on to attend the Emory University School of Law, earning her Juris Doctor in 2025. During her time in law school, Jada actively sought out opportunities to sharpen her practical legal skills. She became a dedicated member of the Emory Law Transaction Negotiations team, competing against top law schools across the country and developing a keen interest in negotiation, compliance, and healthcare-related matters.

Before stepping into her current role, Jada built a strong foundational understanding of the legal system by serving as an Administrative Legal Assistant with the Cobb County Solicitor General's Office. This valuable experience allowed her to work closely with case management and gain a thorough, practical understanding of courtroom procedures. This early exposure to the daily mechanics of the law reinforced her commitment to personal advocacy and provided her with the essential tools needed to effectively guide clients through stressful legal situations.

Today, Jada brings her passion for helping others to the Morgan & Morgan office in Alpharetta, where she serves as a dedicated pre-suit attorney focusing on car accident cases. She applies her strong negotiation skills and background in case management to build the best possible foundation for her clients right from the start, ensuring they receive compassionate and effective representation. Outside of her busy legal career, Jada is a highly creative individual who loves immersing herself in artistic pursuits, particularly playing the bass guitar and writing her own music.
